Frequently Asked Questions

- Q Is the LCD screen touch-enabled?
A The LCD screen is not touch-enabled.
Use the keys in the back to control the Photo Display.
- Q After copying photos, how can I check if the photos are already stored inside?
A The photos are copied after the screen confirms with "photo copied" message.
You may view pre-stored photos.
- Q Can I switch between different photo slideshows by using different memory cards?
A Yes, the Photo Display will show the slide show of photos stored in the card currently connected.
- Q Can I use the Photo Display to delete photos on memory cards?
A Yes, it supports operations to delete photos on external devices.
- Q Can I print photos from Photo Display?
A No, it does not support direct photo printing.
